EMPLOYMENT HISTORY.

Vehicle-wash-service
Developed a comprehensive backend solution for managing vehicle wash services, including user authentication, bookings, payments, service management, and real-time notifications.
Tools:
Frontend: Postman | Backend: ExpressJs (Node.js)
Database: MongoDB |Prisma ORM | API: RESTApi

Sharing New Experience
A platform for users to share their experiences, such as visiting new places or trying new foods, and for others to discover these shared insights. Features include user authentication, social login, experience categorization, map integration, reviews, and notifications. Built with TypeScript, Prisma ORM, and Firebase, the app ensures seamless data management and real-time updates.
Tools:
Frontend: Postman | Backend: ExpressJs (Node.js)
Database: MongoDB |Prisma ORM | API: RESTApi

Social-Sync
Social Sync is a powerful team collaboration and project management tool that streamlines task tracking, communication, and progress monitoring. It features notifications, file sharing, and role-based access control for seamless teamwork. Designed for scalability and customization, it enhances productivity by simplifying workflows and fostering efficient collaboration.
Tools:
Frontend: Postman | Backend: ExpressJs (Node.js)
Database: MongoDB |Prisma ORM | API: RESTApi

Alcohol-Tracking
It helps users monitor drinking habits, set goals, and engage with the community. It features secure authentication, notifications, drink tracking, standardized units, and personal challenges. Users can join groups for chatting, share insights via blogs, and manage profiles, ensuring a seamless experience for mindful consumption.
Tools:
Frontend: Postman | Backend: ExpressJs (Node.js)
Database: MongoDB |Prisma ORM | API: RESTApi

E-commerce User Application
Developed a user-friendly e-commerce platform that allows users to browse products, add items to the wishlist and cart, and complete transactions. The application includes features for product management, user authentication, order tracking, and payment integration.
Tools:
Frontend: Postman | Backend: ExpressJs (Node.js)
Database: MongoDB |Prisma ORM | API: RESTApi
